### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Robert R. Reed on 6/2/2005.
3. The application has been amended as follows:
  - a. Claim 1 has been amended to read as follows:
    1. (currently amended) A compact ratchet wrench for attaching or removing a threaded fastener, said wrench comprising:
      - a wrench head made integral with a wrench handle;
      - a jaw and gear assembly including first and second jaws and a gear unit, wherein said jaws are carried and guided by said gear unit to translate with respect to one another and wherein said gear unit is carried by said wrench head and is free to ratchet within said wrench head;
      - a jaw adjuster assembly including a jaw adjuster disk connected to a scroll plate positioned interior to a cap, wherein rotation of said jaw adjuster rotates said scroll plate within said cap and wherein said scroll plate is made to interface with said jaws; and

a snap ring placed in a disk groove of said jaw adjuster disk to extend into an adjacent scroll plate groove of said scroll plate to connect said jaw adjuster disk with said scroll plate so that they rotate as a unit within said cap; and

first and second support rails that assemble and hold said jaws within said gear unit and rotationally support said jaws and gear assembly connected with said wrench head, wherein said jaws can be opened and closed by rotating said scroll plate when said jaw adjuster assembly is connected with said jaw and gear assembly so that said jaws mesh with said scroll plate.

- b. Claim 8 has been cancelled.
- c. Claim 13 has been amended to read as follows:  
13. (currently amended) The tool of claim 12 ~~wherein~~ wherein said elongated wrench and said cylindrical wrench head are made as a single unit.
- d. The line, "Figure 8G is a top plan view of the support rails;" has been added between lines 8 and 9 on page 8 of the specification.

4. The following is an examiner's statement of reasons for allowance: The art of record (considered as a whole) neither anticipates nor renders obvious a snap ring placed in a disk groove of said jaw adjuster disk to extend into an adjacent scroll plate groove of said scroll plate to connect said jaw adjuster disk with said scroll plate so that they rotate as a unit within said cap or gear splines on an exterior surface gear unit of the gear unit that meshes with cap splines on an interior cap surface in combination with the rest of the claimed limitations set forth in the independent claim.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bryan R Muller whose telephone number is (571) 272-4489. The examiner can normally be reached on Monday thru Thursday and second Fridays.
